CAREER OBJECTIVE

Analytical thinker with communication skills. Looking to pursue a challenging position to utilize my technical skills of Python, Statistics, Data visualization and Machine Learning. Also have the potential to resolve problems with excellent Data organizational abilities to help out company to satisfy their goals.

PROJECTS

Project 1

EDA - Bank-Marketing

- Performed 'Exploratory Data Analysis' on data set 'Bank Marketing'.
- Examined how campaign was effective for which type/group of people.
- Tools used Python, imported relevant libraries required to this project such as Pandas, NumPy, Seaborn.

Project 2

EDA - Housing

- Applied 'EDA' concepts on data set 'Housing'.
- Used Python and its libraries for data framing and visualizing
- Examined the outliers of the dataset and identified the types of data.
- Deal with the outliers and skewness and cleaned the data.
- Applied Data visualization techniques.

Project 3

EDA - Supermarket

- Performed 'Exploratory Data Analysis' on data set 'supermarket'
- Tools used Python, imported relevant libraries required to this project such as Pandas, NumPy, Seaborn.
- Examined distribution of the variables and outliers.
- Gone through the questions given with the help of data visualization.

EDUCATION

2020 - 2023

Gujarat Technological University

Bardoli

Bachelors of Vocations
Software Development

2019 - 2020

GSHSEB

Vyara, Gujarat

Higher Secondary School Certificate
Science | 48%

ACHIEVEMENTS

- I had leaded and successfully completed the Website designing Project at college .
- Attended the industrial training in PHP Web-Development, Application Development and Infrastructure Engineering.
- Attended NumPy and Pandas session at Google Developer Students Club(GDSC) .
- Was the Lab representative in my batch at college.
